

Santiago Camilo Rey Benavides

 santiagoreyb •  santiagoreyb •  santiagoreyb.vercel.app
 Bogotá, Colombia

I am a Systems Engineer with solid experience in **full-stack development** and the deployment of **cloud architectures**. Specialized in the design and construction of **web, mobile, and video game** applications, I stand out for integrating advanced **Artificial Intelligence** solutions, supported by scalable and secure infrastructures. With a technical rigor focused on best practices, I am passionate about leveraging modern technologies to create efficient, user-centered products oriented towards accessibility and sustainability.

Experience

ECU Worldwide **Bogotá, Colombia**
EDI Developer / Full Stack Developer *Dec 2025 – Present*

- **Developed scalable full-stack applications** using **Angular, .NET (C#/VB), and Python**, actively participating in the definition of modern architectures and best engineering practices.
- **Led complex customs integrations** across LATAM and the US (XML, EDI, PDF), streamlining shipments and reducing operational costs. Managed integration efforts and resolved strict technical requirements.
- **Architected automated data pipelines** and secure webservices via SFTP to guarantee highly reliable communication and data transfer between enterprise systems.
- **Optimized database performance** by designing and refining complex queries and stored procedures in **PostgreSQL and SQL Server**.
- **Managed cloud infrastructure on Microsoft Azure**, collaborating with DevOps teams to deploy robust **CI/CD** pipelines, troubleshoot deployments, and ensure production scalability.

Colpensiones **Bogotá, Colombia**
Full Stack Developer and Automation Engineer *Feb 2025 – Nov 2025*

- **Optimized internal operational efficiency** by developing applications with **.NET (C#), Angular, TypeScript, and SQL Server**, achieving a **30% reduction** in processing times.
- **Architected and implemented secure REST APIs**, significantly strengthening system communication and interoperability across institutional digital platforms.
- **Elevated software quality** by integrating automated unit and integration tests, successfully decreasing production errors by **25%**.
- **Promoted agile practices** as an active Scrum participant, accelerating delivery cycles and ensuring technical processes were accurately documented for cloud deployments.

AWAQ Organization **Bogotá, Colombia**
Developer and Scrum Master *Feb 2024 – Nov 2024*

- **Led the end-to-end development of the 3D game EcoGuardians** using **Unity (C#)**, significantly increasing user engagement and promoting environmental awareness.
- **Optimized application performance** and overall user experience by minimizing loading times and ensuring seamless cross-platform fluidity.
- **Directed a multidisciplinary team** using Scrum methodologies, consistently meeting **100% of sprint objectives** and fostering a strong culture of technical collaboration.

Education

Pontificia Universidad Javeriana **Bogotá, Colombia**
Systems Engineering *2021 – 2025*
Honors: Academic Excellence Scholarship • Honorable Mention for Graduation Project.

Highlighted Courses & Certifications

Microsoft Certified: Azure Fundamentals (AZ-900)
Microsoft *Aug 2026*
Official certification in cloud fundamentals: cloud concepts, Azure architecture and services, management and governance.

Generative AI Leader Certification
Google *Jul 2026*
Official Google Cloud certification in Generative AI: strategy and adoption of generative AI solutions in business environments.

AWS Certified Cloud Practitioner Amazon Web Services Official certification in AWS cloud fundamentals: core services (EC2, S3), security, architecture, and pricing model.	Jun 2026
AWS re/Start Graduate Amazon Web Services Completed program in AWS Cloud fundamentals, Linux, networking, security, and databases.	Jun 2026
Associate Cloud Engineer (GCP) Google Official certification in deployment, management, and maintenance of cloud solutions on Google Cloud Platform.	Feb 2026
Bootcamp Azure AI Engineer Associate Código Facilito Design and implementation of Artificial Intelligence solutions on Azure, use of cognitive services and machine learning.	Mar 2026
Cloud Computing with Azure and AWS Universidad de los Andes Architecture, administration, governance, DevOps, and automation of services in Azure and AWS.	Jul 2025
Programming and Coding Diploma Samsung & Pontificia U. Javeriana Programming fundamentals in C and C++. Design of interactive solutions using Arduino and Scratch.	Jun 2021

Languages

Spanish: Native • English: B2

Skills	Highlighted Projects
■ AI: LLMs (Codex, Gemini, Cursor, Copilot), Machine Learning, RAG Architectures, NLP, LangChain, LangGraph, Autonomous Agents, TensorFlow. ■ Languages: .NET (C#/VB), Java, TypeScript, JavaScript, Python, C++, Kotlin. ■ Frontend: Angular, React, Tailwind, HTML5, CSS3. ■ Backend: .NET Core & Framework, Node.js, Spring Boot. ■ Databases: PostgreSQL, SQL Server, Oracle, MongoDB. ■ DevOps & Cloud: Azure, GCP, AWS, Docker, CI/CD, Git, Linux (Ubuntu, Red Hat). ■ Mobile: Android Studio, Kotlin, Flutter (basic).	■ SURE Agent (AI/RAG): Intelligent agent for decision-making with Azure OpenAI. ■ NeonCat (Unity): 3D video game for GameJam. ■ CuantoNecesitoPUJ: Full stack academic web application (Spring Boot, Angular). ■ WhereIsIt: Mobile app in Kotlin with Firebase and Google Maps API for real-time tracking. ■ Neural Networks - Wine: Machine Learning model with TensorFlow and Pandas for quality prediction. ■ EcoGuardians 2.0: Interactive 3D video game for raising awareness about biodiversity, developed as a degree project with an Honorable Mention.
